

Fourth POS Integration Agent Silent Install and Auto-registration Instructions

The Prep Work

- Receive Auto-Registration Code, Company External ID, Store External ID, and Concept External ID from Fourth
- Whitelisting required:
 - <https://agent-pos-na1.fourth.com>
 - <https://tools-pos-na1.fourth.com>
- Websites used for setup:
 - https://tools-pos-na1.fourth.com/agent_download
 - 32bit and 64bit versions available
- Download the agent installer to the machine or IT downloads the installer to a central point for Software distribution

THE PROCESS;

CREATE INSTALLATION SCRIPT

Parameters for the command line execution of the Agent Installer:

```
/VERYSILENT /register=true /namespace=<company external ID> /code=<auto-reg code provided>  
/store=<store external ID> /concept=<concept external ID>
```

Example:

```
BodhiAgentSetup-1.0.6-x64.exe /VERYSILENT /register=true /namespace=123456789 /code=WWW-  
LLLL-EEEE-MMMM /store=12368 /concept=123456
```

USING INSTALLATION SCRIPT User executes the installer Agent installs and uses the provided information to bind to the namespace and the store

Confirmation of successful installation can be found at: <https://tools-pos-na1.fourth.com/sync>

Agent Auto Uninstall parameters:

```
/VERYSILENT
```

From BodhiAgent folder run the uninst000.exe with /VERYSILENT

This method of uninstall will re-use the current registration. If a new registration code is needed, then the uninstall must be done manually and the user must choose to not keep the registration file.

To perform the auto-registration on the same machine, you must also remove the .agent file from C:\Users\...\AppData\Roaming\agent
